

Distributor Opportunities

ESP, the number one power protection company in the world, is looking for international distributors

At ESP, we've got you covered in more ways than one.

Power surges and electrical disturbances found in buildings and power supplies can damage the efficiency and reliability of office equipment, ATM and KIOSK machines, Point-of-Sale systems, electronic signage and flatscreen televisions. These common power problems can cause jams, lockups, color and image degradation, software corruption, board failures, downed systems and catastrophic equipment damage.

- **ESP has 85% marketshare in the United States and is expanding globally through a network of independent distributors. If your company has an influence in these markets, country coverage, solutions sales people, and contacts in business, industry and government, ESP offers a unique opportunity to add a new and profitable dimension to your business.**
- **The investment is minimal as there are no parts to stock or engineers to train. ESP will provide the marketing information and sales training and support your efforts through a variety of events and special programs.**
- **Opportunities exist in both Eastern and Western Europe, North Africa, the Middle East, Scandinavia, and the Baltic countries, Russia and the Ukraine, India and Asia Pacific.**

Benefits of ESP Power Filter

- ▶ Protects digital office equipment from electrical surges, spikes, lightning, and ground noise
- ▶ Reduces service calls, extends equipment life, and improves equipment reliability
- ▶ Upgrades your equipment service contract to include extended coverage for damage caused by power related "Acts of God"
- ▶ ESP offers a Lifetime Protection Guarantee on the product and an Extended Warranty on all attached products.
- ▶ Features ETL-certified CAT5e Network Protection and Fax/Modem DSL Filtration to prevent network disturbances and damage
- ▶ Eliminates the risk of shock hazards caused by improperly grounded outlets
